Paper Kraft take-out food containers are made from 100% recycled cardboard paper using 35% or more post-consumer recycled paper. These biodegradable take out boxes are processed chlorine free. They reduce the amount of packaging you use because they can hold any type of food from hot, cold, wet, or dry food products and are microwaveable due to a special grease resistant inner coating.

100 % Recycled

Aluminium is used for packaging as it is highly malleable: it can be easily converted to thin sheets and folded, rolled or packed. Aluminium foil acts as a total barrier to light and oxygen (which cause fats to oxidise or become rancid), odours and flavours, moistness, and germs, and so it is used broadly in food and pharmaceutical packaging, including long-life packs (aseptic packaging) for drinks and dairy goods, which allows storing without refrigeration

## Nitrile Gloves

Nitrile Gloves are the perfect compromise between latex and vinyl. Nitrile is made from an allergy safe compound that feels a lot like latex but it's much stronger, costs less, and is more comfortable to wear.
